Some points to ponder

Remember the first module which shows how everything is connected.

What are some of the possible effects of climate change?

The effects of climate change at a national level

How will climate change impact agriculture?

How do you see climate change affecting you and your family?

What needs to be done about climate change?

Combating Climate Change and who should take the lead

Alternative to fossil fuels (considered the leading culprits in climate change) is to use natural oils like those from vegetables. Some argue that this is taking away from farming for consumption. What do you think?

Climate change and its impact on the Caribbean's marine ecosystem

What other areas do you see being affected by climate change's impact on the marine ecosystem?

What measures would you enforce to ensure the preservation of the Caribbean's marine Ecosystem?
